TLS-450PLUS, TLS4, & TLS4B Automatic Tank Gauges

Fuel Management System Data at Your Finger Tips

The remote access features of the TLS-450PLUS, TLS4, and TLS4B Automatic Tank Gauges (ATGs) deliver critical inventory and site data when and where it's needed. Monitor alarm notifications and inventory levels in real-time so immediate action can be taken. Resolve issues remotely to reduce dispatching and maintenance costs. With multiple ways to connect to your ATG, you have the tools needed to react fast and reduce site downtime.

THE PLUS VIEW App

THE PLUS VIEW is a mobile app for Android and Apple iOS that connects you directly to tank gauge data no matter where you are. Managers and owners can easily monitor their fuel site inventory and alarms while they are off-site.
- Station overview for an immediate status check on tank inventory
- Reports tab allows quick access to inventory and last delivery reports
- Alarms tab gives you instant access to view active alarms at a site

Web-Enabled Interface

Take action to resolve on-site issues remotely by connecting to your ATG settings and diagnostics using the web-enabled interface. View your site's status, run reports, and make adjustments without even being on-site.

- Modify ATG configurations and access diagnostics
- Print wet stock management and compliance reports
- Email notifications for alarms and reports

Centralized Device Management (CDM)

CDM is a server-based software package providing remote access and control of ATGs within your entire network of sites.

- Update ATG software with the latest release
- Backup site console data
- Monitor any changes to the console's configuration
