FlexPay 6 M1-15 OPT
WITH 15" TOUCHSREEN

The Invenco® FlexPay 6 M1-15 OPT is an EMV PCI 5.x with SRED (pending the PCI 6 release) compliant modular payment terminal with rich-media touchscreen and an open platform suited to any self-service or unattended payment environment. It comes with the 15-inch super-sized touchscreen, which is built for the outdoors.

Usage extends across self-service restaurants, gas stations, truck stops, parking stations, airports, marinas – anywhere you want to give your customers an exceptional 24/7 payment experience they can deliver themselves.

For the ultimate customer engagement experience: interactive touchscreen with high-definition rich media & video

KEY BENEFITS

- Offer contactless and mobile wallet payment
- Bring the benefits of multi-media and touch to your customer experience
- Drive promotions with larger screens
- Take control by building your own applications
- Keep customers engaged with responsive content
- Minimize maintenance with remote terminal management
- Provide a consistent user experience
- You aren't tied into one service provider
- Lower service costs via cloud delivery
- Widescreen format; more real estate for graphics

KEY FEATURES

- 15" HD touchscreen
- EMV chip and contactless as standard
- Cloud connection as standard
- 1D/2D barcode reader
- Optional printer modules
- Extensive peripheral connectivity options
- Open API for third party app development
- Wide range of retrofit options
- Designed for extreme operating environments
- Supports cloud-based terminal and media management features
- Use the touchscreen in wet conditions and when wearing gloves

UNDERSTAND THE INVENCO DIFFERENCE

Invenco is a global provider of revolutionary self-service payment technology and secure customer engagement solutions. With a strong presence in the petroleum retail vertical, Invenco's product lines include FlexPay 6 A1-09 and FlexPay 6 M1-15 Outdoor Payment Terminals, iNFX retail micro-services (including electronic payment server), cloud services and Invenco Link, a high-speed Ethernet enabling device. In 2018 Invenco introduced i2, the world's first outdoor EMV as a service, to help US fuel retailers avoid the EMV liability shift without the burden of a large upfront investment. Invenco has deployed over 100,000 EMV payment terminals engaging millions of customers every day. Invenco is headquartered in Auckland, New Zealand and operates offices in the U.S., Canada, Malaysia and the UK.
